

---

**Creator:** Bailey, Stanley F. (Stanley Fuller), 1906-

**Title:** Stanley Fuller Bailey Papers

**Date (inclusive):** 1940-1951

**Extent:** 4 linear feet

**Abstract:** Stanley Fuller Bailey (1906-1981) served as Professor of Entomology at the University of California, Davis. His research focused on agricultural entomology, specifically bean thrips, pear thrips and the peach twig borer. His papers contain correspondence to researchers and growers regarding the control of crop pests, as well as manuscripts of some of his writings, including several on thrips.

**Physical location:** Researchers should contact Special Collections to request collections, as many are stored offsite.

**Repository:** University of California, Davis. General Library. Department of Special Collections.

Davis, California 95616-5292

**Collection number:** D-098

**Language of Material:** Collection materials in English

### Biography

Stanley Fuller Bailey was born August 1, 1906 in Middleboro, Massachusetts. He graduated with a degree in Entomology from the University of Massachusetts in 1929 and received a Ph.D. from the University of California, Berkeley in 1931.

He joined the staff of the University of California, Davis as a junior Entomologist and over a period of thirty-six years advanced to full professor. His research focused on agricultural entomology, specifically bean thrips, pear thrips and the peach twig borer.

During World War II, Bailey accepted a commission as Lieutenant in the Medical Service Corps of the U.S. Navy and served in North Carolina, Florida, and the Central Pacific Theater, eventually attaining the rank of Captain. After the war he returned to the University of California, Davis to become head of the Department of Entomology (1946-1957) and to continue his teaching and research in agricultural entomology. Most of his later work focused on the California mosquito vectors of encephalitis and malaria.

Bailey passed away on April 19, 1981.

### Scope and Content

The four linear feet of the Stanley Fuller Bailey Papers spans the years 1940-1951. However, the papers lack materials from 1944-1945 while Bailey was serving in the U.S. Navy. The majority of the papers contain correspondence to researchers and growers regarding the control of crop pests. Also included are manuscripts of some of Bailey's writings, including several on thrips.

### Arrangement of the Collection

The collection is arranged in four series: 1. Correspondence, 2. Works by Bailey, 3. Subject Files, 4. Printed Material.

### Indexing Terms

The following terms have been used to index the description of this collection in the library's online public access catalog.

Bailey, Stanley F. (Stanley Fuller), 1906--Archives

University of California, Davis--Faculty--Archives

Agricultural pests--Control--Research

Entomology--Research

Thrips--Research

Peach twig-borer--Research

### Access

Collection is open for research.

### Processing Information

Sara Gunasekara processed these papers and created and encoded this finding aid.
