Descriptive Summary

Title: Douglas Menez Photography collection

Dates: ca. 1986-2002

Collection number: Mss Photo 451

Creator: Menez, Douglas

Collection Size: 23 linear ft.ca. 50,000 photographs

Repository: Stanford University. Libraries. Dept. of Special Collections and University Archives.

Abstract: Contains photographs from Menez's Silicon Valley documentary. Includes negatives, slides and prints.

Languages: Languages represented in the collection: English

Access

Collection is open for research; materials must be requested at least 24 hours in advance of intended use.

Publication Rights

Property rights reside with the repository. Literary rights reside with the creators of the documents or their heirs. To obtain permission to publish or reproduce, please contact the Public Services Librarian of the Dept. of Special Collections.

Preferred Citation

Douglas Menez Photography Collection, Mss Photo 451. Dept. of Special Collections, Stanford University Libraries, Stanford, Calif.

Acquisition Information

Gift of Douglas Menez, 2004. Accession 2004-060.

Biography / Administrative History

Douglas Menez began his career shooting for newspapers in 1978, and shortly thereafter won an internship at the Washington Post. In 1982 he began working for Time, Life, Newsweek, US News, Fortune, People, USA Today and other national and international publications, accepting assignments to cover news, feature stories and sports in the US and abroad.

Menez has covered many of the major news stories of the day, including the famine in Ethiopia, presidential campaigns and party conventions, and the Los Angeles Olympics in 1984. He has documented the homeless in America, the destruction of the Amazon rain forest and the AIDS story. His work has appeared in six Day in the Life books, The Power to Heal, and the Circle of Life.

In 1987, Menez began specializing in black-and-white photojournalism of business and technology. He has completed special assignments, annual reports, books, videos and long-term documentary projects worldwide for such companies as Apple Computer, Adobe Systems,

Beckman Instruments, Eastman Kodak Company, J.P. Morgan, and Sun Microsystems.

In 1989, Menez co-produced *15 Seconds: The Great California Earthquake of 1989*, using Macintosh computers to complete book layout and design in ten days. It was number one on the San Francisco Chronicle bestseller list, sold 70,000 copies in three months and raised over a half-million dollars for earthquake victims.

In October 1993, Menez completed *Defying Gravity: The Making of Newton*, (Beyond Words Publishing) a dramatic, behind-the-scenes documentary of Apple Computer's quest to invent a new technology for a new market. Menez combined his photos with text by Markos Kounalakis to give business readers a case study relevant for companies seeking new ways to survive and compete in the new global economy in the 1990's.

Scope and Content of Collection

Accessions 2004-060 and 2005-126 comprise series 1: the Silicon Valley documentary. Negatives have been pulled and filed in series 3: Negatives. Electronic media has been pulled and filed in series 4: Electronic Media. Series 1 contains prints, slides and contact sheets. It is divided into two principal subseries: jobs and edits. Jobs are identified by the project or job name: 24 Hours in Cyberspace, Adobe Corporation, Apple Corporation, Against All Odds-One Digital Day, Defying Gravity, Kleinar Perkins, Newton, Next and Farallon. Subsubseries correspond to what Menez refers to as "jobs." In the case of the Against All Odds-One Digital Day project a number, for example "102_01", is the job name. In other cases the specific job bears the name of the corporate entity and the date it was completed. Subseries 2 Edits includes Silicon Valley and Reportage Selects.

Arrangement

Please note: although series 3 Negatives mirrors the the structure of series 1, not every negative has a corresponding print, slide or contact sheet. The scope content field for most folders contains a complete list of the contact/negative sheet numbers assigned by Menez and his staff.

Indexing Terms

The following terms have been used to index the description of this collection in the library's online public access catalog.

Computer software industry--United States--Photographs

Photoprints

Series 1 **Silicon Valley Documentary 1988-2002**

Physical Description: 26 linear ft.

Scope and Content Note

This series contains the prints, slides and contact sheets that relate to Menez's documentary work in Silicon Valley.

SubSeries 1.01 **Jobs 1988-2002**

Physical Description: 24.25 linear ft.

Scope and Content Note

This subseries is arranged by project or job name, in most cases the corporate entity documented.

Subsubseries 1.01.01 **24 Hours in Cyberspace**

Physical Description: 3 folders

Biography/Organization History

24 Hours in Cyberspace (1996) is a compilation of images taken by the world's top photojournalists. Doug Menez was one of 150 photographers who captured images documenting the effects of digital technology on people across the globe. The project constituted a photographic "freeze frame"; all images were all taken and submitted on February 8, 1986. Menez's contributions included photographs of Greg Miller "11 year old software mogul", Netscape co-founder Marc Andreessen, INTUIT co-founder Scott Cook.

Subsubseries 1.01.02 **Adobe Systems 1988-1995**

Physical Description: ca. 4.5 linear ft.

Biography/Organization History

The San Jose (Calif.) based Adobe Systems was founded in 1982 by John Warnock and Charles Geschke. Adobe reached national prominence in 1985 when it licensed its PostScript software to Apple. In the late 1980s the company specialized in digital fonts. Doug Menez documented life at Adobe between 1988 and 1995, a time-span that included the launching of Adobe Photoshop and the early development of PDF (Portable Document Format). This series contains black and white contact sheets as well as working and final prints.

Subsubsubseries 1.01.02.01 **Adobe 1988**

Physical Description: 9 folders

- Box 1, Folder 1 Series 1 **Adobe Binder no. 1 [1 of 7]1988 Aug.** S-01
Physical Description: contact sheets : 28 x 21 cm. : black and white

Subsubseries 1.01.03 **Apple Computer 1990-1997**

Physical Description: ca. 1.75 linear ft.

Biography/Organization History

The now mythical history of Apple Computer began with the release of the Steve Wozniak's Apple I in 1976. The company went public in 1980 following the release of the Apple III. The early 1980s saw a variety of growing pains which the company addressed by hiring PepsiCola's John Sculley as CEO. In 1985 Apple laid off nearly one fifth of its work force in 1985. Also during this time Sculley and Microsoft's Bill Gates became embroiled in a debate over the introduction of Windows 1.0, which had many similarities to the Mac GUI. By the time Doug Menuez came to Apple in 1990 the company had secured its niche market and once again become profitable. More than 9,000 people worldwide were on the Apple payroll. This series contains black and white contact sheets and prints documenting various Menuez projects, including the Super Mac, New Mac, Blue Print and Apple Rock Science.

Subsubseries 1.01.04 **Against All Odds, One Digital Day 1997**

Physical Description: 1.5 linear ft.

Biography/Organization History

Published one year after 24 Hours In Cyberspace(1996), One Digital Day represented a second attempt by Rick Smolan to capture a "freeze frame" of how the microchip has changed the lives of people across the globe. This time Menezes was one of 100 photojournalists dispatched on July 11, 1997 with the goal of capturing the distinctly human face of a technological revolution. The color and black white slides in this series mainly illustrate the building of micro-processors.

Subsubseries 1.01.07 **Newton 1992-1993**

Physical Description: 4.5 linear ft.

Biography/Organization History

Marketed between 1993 and 1998 Apple's Newton anticipated the now ubiquitous PDA (Personal Digital Assistant). Like the PDA it employed handwriting recognition software. Users found the Newton's ability to recognize and translate handwriting lacking and this fact, combined with a high market price led Apple to pull the product altogether in 1998. Doug Menezes's photographs document the Newton project in its early stages.

Physical Description: ca. 10.5 linear ft.

Biography/Organization History

After a much publicized power struggle with Apple CEO John Sculley in 1985, Apple co-founder Steve Jobs started NeXT Inc. with \$7 million of his own funds. Jobs imagined creating a toolkit predicated upon object-oriented programming. The company shifted gears in 1986 when it decided to build complete machines. The following year a fully automated factory was constructed to produce the NeXTcube computer. The NeXTcube met with mixed results when it hit the market in 1990. Slower than contemporary Unix workstations, it also sold for half the price. Eventually, performance problems took a toll. By 1991 only 50,000 NeXTcubes had been sold. One of these, however, was used by Tim Berners Lee to create the first web browser and server. In the early 1990s NeXT shifted focus from hardware to software applications. In 1996 Apple purchased NeXT with the intention of using NeXT software to replace the Mac operating system. Doug Menuez's photographs chronicle the optimistic early days of NeXT, Inc.

Subseries 1.02 **Edits**

Physical Description: 1.75 linear ft.

Scope and Content Note

This subseries contains photographs removed from the Silicon Valley documentary series by Menezes and others for editorial purposes.

Subseries 1.02.01 **Reportage Selects****Physical Description:** .25 linear ft.**Biography/Organization History**

Doug Menez formed Reportage in 1990 in order to build upon the successes of the Day in the Life series. The company is modeled upon Menez's own practice of immersing himself in the corporate culture in order to capture images that can be used both for promotional and commercial purposes and photojournalistic ones. Reportage keeps photographers on month long retainers and asks them to spend a minimum of six months on the job. The photographer retains the right to use images for in-house purposes such as annual reports and fliers while Reportage itself lends editorial expertise and provides a photo-documentary clearing house.

Scope and Content Note

This subseries includes the contents of a binder marked "Reportage Selects" and contains slides relating to Adobe, Farallon, TFI and NeXT.
