Processing Information

The digitization project was part of the California Local History Digital Resources Project (LHDRP), a multi-year program supported by the U.S. Institute of Museum and Library Services under the provisions of the Library Services and Technology Act, administered in California by the State Librarian. Leveraging the infrastructure of the California Digital Library (CDL) in partnership with Califa and Infopeople, the LHDRP

explores a model to aggregate, preserve, and provide permanent public access to local history materials maintained by California cultural heritage institutions via a single statewide online access point. For more information, see the [LHDRP website](#) .
