Abstract: S. L. Washburn papers contain correspondence, writings, research notes, lectures, speeches, field notes, biographical information and photographs relating to his career in physical anthropology at the University of California, Berkeley. Correspondence is mainly professional with colleagues at Berkeley, in the United States, and abroad. Prominent correspondents include Irvn Devore, Phyllis C. Jay, L.S.B. Leakey, and the Wenner-Gren Foundation for Anthropological Research. Washburn's writings relate to his expertise in and teaching of evolution, as well as documenting his role in education. Field notes relate to primate anatomy and canine teeth. U.C. Berkeley courses are reflected in syllabi, reading lists and lecture notes. Subject files document Washburn's participation in conferences, including speeches and programs, as well as professional activities with the National Science Foundation. Also includes biographical information, research photographs and negatives, and other illustrations and tables.

Scope and Content

The S. L. Washburn Papers contain professional and personal correspondence, writings, research notes, lectures, speeches, field notes, biographical information and photographs. Some of the collection dates back more than 50 years and illustrates the breadth and evolution of not only physical anthropology as a discipline, but specifically Dr. Washburn's illustrious and lengthy career in anthropology. Virtually all of the professional and academic material included is from Dr. Washburn's tenure at the University of California, Berkeley.

Series 1, General Correspondence comprises a large part of the collection and is primarily professional in nature. Interdepartmental memoranda and letters to and from colleagues within the domestic and international anthropology community, and correspondence with publishers form the bulk of this series. Prominent correspondents include Irven Devore, Phyllis C. Jay, L. S. B. Leakey, and the Wenner-Gren Foundation for Anthropological Research.

The Writing Series illuminates Dr. Washburn's expertise on evolution and his passion for teaching it, as embodied in "The Fun of Human Evolution!" Other pieces, such as "Why Schools?," demonstrate Dr. Washburn's role as an administrator and his contributions to the educational system as a whole. Series 2 contains papers he prepared for lectures, talks and speeches, such as "Behavior and the Origin of Man," the Huxley Lecture. Also included is a draft of an unpublished book entitled *The Human Past*.

Series 3, Field Notes, contains material on primate anatomy, canine teeth and measurements. Included in this series are eight oversize folders containing notes from Washburn's field work from 1939-1940. The series comprises a very small part of the collection. It provides measurements of various species and a brief glimpse of hard physical anthropological data.

Series 4 is a straightforward compilation of U. C. Berkeley courses taught by Washburn, ranging from Anthropology 1 to 200, and an interdisciplinary human sociobiology course. The material includes class syllabi, reading lists, and transcribed lecture notes.

Series 5, Subject Files, is divided into two subseries, conferences and professional activities. The first subseries, Conferences, contains speeches given by Dr. Washburn and literature and programs about many of the symposia. This is a particularly interesting section because it highlights Washburn's international reach and reputation. It is highly detailed at some points within this subseries, as illustrated by the verbatim transcriptions of the Wenner-Gren Conference on "Primate Social Behavior." The second subseries, Professional Activities, pertains to Washburn's work with the National Science Foundation, specifically its teaching project. In addition, there are detailed chronological listings of his public appearances and dates of publications.

Series 6, Biographical Information, chronicles Washburn's career through certificates, honors, interviews, newspaper clippings and documentation of his trips to East and South Africa

Finally, Series 7 consists primarily of research photographs, negatives, illustrations and instructional charts and tables. The series contains research photographs of primates, in the wild, at a research center and dissected, as well as animals, landscape, people and conferences.

Carton 6, Boxes ~~S~~SERIES 7: PHOTOGRAPHS, circa 1936-1971.

Scope and Content Note

Arrangement

Carton 6 is arranged alphabetically by subject of photographs. Boxes 1-2 house 4x5 negatives and various sizes of positives. Many of the negatives in these boxes have matching positives immediately following them. Boxes 3-4 are 8x10 and 5x7 negatives, respectively. Box 5 houses large photographs, sketches, illustrations and charts. The majority of the photographs are black and white. Often one image is replicated in many formats: negatives and large, medium and small sized prints.
