Descriptive Summary

Title: Douglas Houghton Campbell Papers,

Date (inclusive): 1888-1953

Collection number: Stanford University Archives SC 022

Creator: Campbell, Douglas Houghton

Extent: 1.5 linear ft.

Repository: Stanford University. Libraries. Dept. of Special Collections and University Archives.

Language: English

Access Restrictions:

None.

Publication Rights:

Property rights reside with the repository. Literary rights reside with the creators of the documents or their heirs. To obtain permission to publish or reproduce, please contact the Public Services Librarian of the Dept. of Special Collections and University Archives.

Provenance:

Administrative transfer from the Biology Department, Stanford University, 1965.

Preferred Citation:

[Identification of item], Douglas Houghton Campbell Papers, SC 022, Stanford University Archives, Stanford, Calif.

BIOGRAPHY

Dr. Campbell was born in Detroit, Michigan on December 16, 1859. He graduated from the University of Michigan in 1882, and received his Ph.D. and LL.D. degrees there. Dr. Campbell taught at Indiana University for several years. He came to Stanford when the University opened in 1891. As a professor of Botany, he has long been recognized as a leading authority on the structure and reproduction of mosses and ferns. He is the author of many books on plant life as well as of monographs and other scientific papers. He died on February 24, 1953 in Palo Alto.

SCOPE AND CONTENT

The papers of Douglas H. Campbell include correspondence, records of the Biology Department, class rolls, bibliography of Campbell's works, and printed works of Campbell's.

ARRANGEMENT

The papers are arranged in three series: correspondence, miscellaneous papers, and printed work. Correspondents represented by a number of letters are mentioned by name in the container list.

Correspondence, incoming
