PRODUCTION DIVISION

Aiji Hashii
DirectorJustus G. Sato
Ass't Director

June 22, 1942

M E M O

To: Mr. Ned Campbell
From: The Production Division (Upon request)
Subject: Camouflage Net Project

The Production Division has been asked for constructive suggestions regarding the Camouflage Net Project. The chief problem, according to Regional Industrial Director Stancliff, is that of securing 1000 workers, and keeping them on the job.

At no time since the start of the project have even 300 been employed at one time, and reports show the turnover in those quitting after a few days has been large.

OUR SUGGESTIONS FOR MAKING THE PROJECT A SUCCESS :

- (1) Let residents know the facts about the project. People feel they have been kept in the dark, have not been fairly informed. We suggest immediately a series of mass meetings for this purpose.
- (2) Clarify the wage situation: Recognizing that this is a war industry worked by citizens who feel entitled to compensation equivalent to that of Americans in any war industry.
- (3) Place the project directly under supervision and control of the Production Division, centralizing authority and responsibility: first, for securing 1000 workers, next, keeping them on the job, and thirdly, filling the production quota.

The Production Division submits the foregoing as constructive suggestions, realizing the urgency and importance of the Net Project. If requested, a report on what the Division believes to be the causes of the project's failure to date, will also be prepared.

Respectfully submitted,

THE PRODUCTION DIVISION

July 17, 1942

FROM: Arthur H. Miller, Chief of Housing & Employment Division
TO: Miss Oiko Murata, Personnel
SUBJECT: Master File

Supplementing my memo of June 23rd regarding the family file, the maintaining and safeguarding of which is your responsibility, the following instructions will apply in all instances:

- (1) No employee is to have access to the information contained in this file except upon the written request of department or division heads or a member of the immediate staff of the Project Director. Such written authority must be presented to you by the person who is to obtain the needed information from the file.
- (2) No cards, documents or correspondence are to be removed from the file by any employee except on the written request of a department or division head or a member of the immediate staff of the Project Director. Any card, document or item of correspondence loaned in this manner will be signed for on a check-out sheet by the person to whom it is loaned and "dummy card" put in the file to replace the loaned folder. In case of a single document or card being loaned from a file, the folder from which it is loaned will be tabbed.
- (3) All folders, cards, documents or correspondence loaned from this file must be returned within 24 hours. If required for a longer period of time, the department to which they are loaned may have a copy made and return the original to your file. In order to be sure that documents do not remain out of this file for longer than the stated period of time, please advise those to whom they were loaned to promptly return them and have your file clerk make a regular check of the files for any outstanding documents.

Manzanar, California

September 8, 1942

FROM: Ned Campbell, Asst. Project Director
TO: Mrs. D'Ille, Supervisor, Community Welfare
SUBJECT: Timekeeping on basis of 44-hour week.

We have instructed the timekeeping department to start on the morning of September 10th, to keep accurate time on all Japanese employees, in order that we may pay time on the basis of a 44-hour week.

This makes it mandatory that employees work five 8-hour days and one 4-hour day per week and any one working less than this period will be paid accordingly. Any one working more than 44 hours per week will be allowed time off.

Please pass this information down through your organization and cooperate with the timekeepers who have been instructed accordingly to report time worked.

We must insist upon the Japanese working a standard working week, as is being done in all activities and industries on the outside, or we will be subject to great criticism if during war time we allow them to contribute any less than this.

MEMORANDUM TO: All Division and Department Heads

SUBJECT: Loan of Typists

Once again we are confronted with an emergency typing job. Approximately 5200 Forms 26 must be typed in duplicate to forward to Washington at the earliest possible moment. Every available typist is now employed. The only way that we can meet this emergency is to borrow thirty typists from the jobs to which they are already assigned for a period of eight working days during which time they will continue on the pay roll of the department which loans them.

There are approximately 225 typists, stenographers, secretaries, and clerks who are also typists assigned to the various departments. In order to accomplish the borrowing in fairness to all concerned, a quota has been established for each department based on the total number employed. We will appreciate it if each department will select its quota as shown below and instruct them to report to 7-13-3 at 8:00 a.m. Saturday, February 20. There will be no overtime required. Please select qualified typists; the better the typists, the sooner the work will be done. Your cooperation will be appreciated.

PROCEDURE FOR THE REPORTING OF ILLNESS IN ORDER TO ESTABLISH
SICK LEAVE OR COMPENSATION

Procedure

Chief Medical Officer at Manzanar Hospital has designated the Medical Social Service as the division to be responsible for seeing that recommendations of physicians concerning such matters as time off work, because of illness; change of occupation because of physical condition, and like recommendations are directed to the proper agencies or divisions within the Center. In order to facilitate matters, a form (see attached) was worked out for the use of the physicians in making their report to the Medical Social Service. Medical Staff makes its recommendations on this form whenever it deems necessary and routinely upon the discharge of a patient from the hospital. This form is then directed to the Medical Social Worker, who is able to send information (concerning time off work to the time-keeping division.) *to the proper divisions*

See attached Project Director's Bulletin #54, refer to page 8, section 7 entitled "sick leave". The entire procedure for the reporting of an employee's illness is outlined here. See also Exhibit 8, which is the form upon which the Medical Social Worker reports the person's illness. A tissue copy is kept of the report, which is made on this form for the Medical Social Service files, and to this is attached the physician's request (which was made on Form #758).

We have found that this procedure has worked out successfully. It has saved the physicians a great deal of time. Prior to the instigation of this plan, physicians were asked to make reports to various divisions. Many times the patients who requested the reports were not certain where the information was to go, and a great deal of time was consumed by the physicians who, not only had to report the illness but had to see that it was directed to the proper division. It seems more fitting for the Medical Social Service to handle the problem of directing information to the proper channels, and to relieve the physicians of this unnecessary burden. It also means that request for information about sick leave can be directed to the Medical Social Worker. This in turn can save the physicians unnecessary questioning from patients and various divisions.

Jack C. Sleath, M. D.
Acting Project Medical Officer

Memorandum to: Section Heads

From: H. E. Norton

Subject: Compensatory Time Earned by Evacuees Subsequent to
January 1, 1944.

Section 50.5.12D of Employment Handbook reads in part as follows:

"Time worked in excess of the prescribed work day shall be limited in all cases to emergencies or unusual circumstances, and it shall be the policy to compensate for this work through the medium of compensatory leave. Overtime in excess of 8 hours in any work day must be ordered and approved in advance by the Division Head in the form of a memorandum addressed to the Project Director. Copies of such memoranda shall be forwarded to the Finance Office and the Personnel Office.

Compensatory leave may be accumulated but shall be taken within 90 days of the close of the week in which such overtime is worked. Every effort shall be made by Section Heads to assist workers in liquidation earned over-time. Compensatory leave may be taken as elected by the worker, subject to the approval of the Section Head but will not be given in amounts of less than one hour.

If, because of unusual or emergency conditions, compensatory leave cannot be granted within the period, the worker shall be given additional compensation for this overtime at the hourly rates specified in the Finance Handbook. Approval for the overtime compensation must be obtained in advance from the Project Director by submitting for his consideration the reasons why the worker was not allowed compensatory leave within the 90-day period.

Time worked in excess of the prescribed number of hours or days shall be recorded by the time-checker on the reverse of Form WRA-115, Revised. Over time will be posted on Form WRA-112 by the division to which the worker is assigned, and it will be the responsibility of this division to see that compensatory leave is liquidated by time off. A tickler system shall be maintained by tabbing WRA-112 or other appropriate means, and workers shall be notified by their timekeepers that such compensatory leave as they have to their credit is due.

Unused balances of compensatory leave may not be transferred between divisions in the same center but are not affected by transfer to another center if the transfer is involuntary or is made at the request of the WRA.

Workers unable to liquidate compensatory leave prior to leaving the center on indefinite leave, seasonal leave, or leave to enter the Armed Forces of the United States, shall be paid for any compensatory leave to their credit. The date of separation shall be extended to cover the amount of compensatory leave to the worker's credit. Payment shall be made according to the hourly rates specified in the Finance Handbook.

The foregoing regulations with reference to compensatory leave, apply only to compensatory leave earned after January 1, 1944."

The above for your information in order that necessary attention will be given to granting compensatory time promptly and to protect the interest of the enlistee who is unable to take compensatory time off within the prescribed limit of ninety days.

Best Brown
August 24, 1943

MEMORANDUM TO: Mr. Ralph P. Merritt
Project Director

SUBJECT: Employment Report on 8-hour Day

Following is a report of my check of the various jobs on Monday, August 23, between 3:00 and 5:00 p.m.

AGRICULTURE: At the north farm all workers were on the job between 3:15 and 3:45. A high wind was blowing up a severe dust storm but all of the men were carrying on their work. At the south farm all workers were on their jobs at 4:15 to 4:30 p.m. The first truck to leave brought the women and left the farm at promptly 4:30. The other trucks followed within 5 to 10 minutes later. One tractor driver was still working at 4:45 p.m. and other men were washing in the irrigation ditch at 4:40 p.m. waiting for the truck.

PUBLIC WORKS: At the staff housing 16 carpenters were working on the outside carpenter work on four of the buildings at 4:10 p.m. Plaster board crews and plumbers working on the inside of several other buildings had quit work at 4:10 p.m. and were loafing around in the rooms apparently waiting for 4:30 to arrive. The inside paint crews in another building had quit work sometime prior to 4:15 p.m. and were lying around in the rooms smoking also apparently waiting for 4:30 to roll around. Only three men of the paint crews were working and they were cleaning up paint cans. At the root storage building the carpenter crew had quit work and were leaving the job at 4:18 p.m. At the construction work on the chicken buildings the crews quit work sometime prior to 4:20 p.m. and were loafing around waiting for the trucks to arrive. The truck left with the men at approximately 4:30 p.m. At the hospital doctors' quarters the inside painting had been completed and at 4:00 p.m. one evacuee was working preparing the floors for painting. The Caucasian linoleum layer who was working there told me that this was the only evacuee who had been working there during the day.

INDUSTRIAL: The women in the Garment Factory worked until promptly 5:00 p.m. One of the cabinet shops which, I understand, has been in the habit of quitting at 4:00 p.m. worked until 4:30 p.m. The other cabinet shop was closed at 4:30 p.m. The Food Processing crews also quit work at 4:30 p.m. I talked over this situation with Mr. Haberle who said that the

workers had requested permission to quit work at 4:30 p.m. so that they might have time to take a bath before going to the mess halls. This request is no doubt a result of the half hour leeway given to the Agricultural and Public Works workers to turn in their tools at the point of employment. The matter of time to bathe before going to the mess halls is, no doubt, a question which all manual workers would like to raise during the hot weather and Mr. Haberle will probably discuss it with Bob Brown.

WAREHOUSES: A quick check of the warehouses between 4:30 and 5:00 p.m. showed that most of them were closed and padlocked before 4:45 p.m. Public Works warehouses, #28 and #29, which are tool storage warehouses were closed at 4:45 p.m.
